Address: Brains and Hammer City Estate, Abuja, Nigeria

Profile

I am a software engineer who is passionate about Web apps and software and the technologies that power them, I have a cumulative of more than six years of professional experience developing web and mobile applications, and also have up to two years of experience working on Dapp and smart contract, I have a passion for dynamic programming and skills in technologies like JavaScript, web3, ether.js solidity, react, solidity and also willing to quickly pick up a new technology and learn swiftly

EXPERIENCE

03/2022 – present
Abuja, Nigeria

Blockchain Developer, *Blockhashlabs*

Blockhashlabs is a company that is based on the development of dapps for clients

I have written clean and well-tested code for various projects for the company using technologies like WEB3, solidity, and react.js

- development of a De-Fi application that was based on a fork developed a crypto lottery platform
- wrote smart contracts for multiple tokens deployed smart contracts to multiple crypto chains
- wrote unit tests for multiple smart contracts developed by other developers

06/2021
Abuja, Nigeria

Front-End Intern, *FstackDev*

Fstackdev is a freelance web development service brought up in helping people out there to develop the best of the best website, apps, branding, etc.

Accomplishment

- as part of a team of five we tackle some front-end bugs, which include language translation
- built interactive website and mobile app for clients
- analyzed requirements, designed and implemented some features for the web or mobile application
